

INFO DOCUMENT

Brade Studio: A growing creative space in the realms of photography and graphic design. We haven't started delivering services in any organized manner yet, neither have we built a team so far. However, yes, we are excited for any new venture or collaborative work on creativity. In finding people and businesses with similar interests in visual storytelling and the art world, we'd like to connect.

Our Focus and Philosophy

Brade Studio is devoted to creativity, quality, and innovation. We believe that visual media carries great potential to drive messages, evoke emotion, and connect people. Our work is marked by:

Creative Vision: We strive to capture different perspectives of the world and create designs that will resonate with your audience.

Attention to Detail: Paying attention to every detail, each project that we get into, whether it is small or big, is all about careful stepping with preciseness of things, doing it such that the final output is of quality.

Client Collaboration: We very much value the input and ideas of our clients. Our relation will be collaborative, with our work being guided by what you want to achieve in order to have the results meet and exceed your expectations.

Future Developments:

As Brade Studio grows in the future, we are excited to be able to offer so much more and help in any way possible. We can hardly wait for what the future holds, working on projects with all sorts of clients. Follow us on Instagram to stay updated and see our growth journey.

Discussion:

Brade Studio is more than just a creative studio; it's where ideas are nurtured and creativity reaches its peak while weaving visual stories. We invite you to share this thrilling experience with us as we explore together the many possibilities of photography and graphic design.

Current Status:

<i>Website:</i>	At this time, Brade Studio doesn't have a decent website. We keep the posting of our portfolio, updates in creative activities, and creatives insight of the day on our Instagram profile. Social media is the way we show our take on artistic ways to be in touch with the audience, from showing new work.
<i>Services:</i>	We don't offer fixed services or packages, but we are open to talking about possible projects. In case you have some creative idea in mind or some kind of situation that you think you could use a service in photography or graphic design, get in touch with us. We'll give a look to your request and we will see how we can work together to reach your goals.
